

Two stage depotted pea sorting machine

The Gingoni depotted pea sorter is custom developed for sorting already depotted peas.

Features:

- The units are custom designed per Client requirements and production rates
- All peas are automatically sorted in the correct grading with a single operator action
- All parts of the machine in contact with food product is manufactured in high grade stainless steel.

General description:

- All depotted peas are sorted in the following grading with a single operator action.
 - 9mm and larger
 - 6 to 9mm
 - Smaller than 6mm

These sizes can be change by replacing the sieve plates based on specific client requirements

- For continuous sorting a the machine makes provision for bolting on a slow moving continuous feeding conveyor, supplied as optional extra.
This allows the sieve to be incorporated into a production line, or for operators to manually depot peas directly onto the conveyor.
- Sorting capacities varies based on Client requirements and can be from a 100kg to 500kg per 8hr day

Model 400/650/9sq/6sq
